

Customer Journey Map

Date	07/07/26	Maximum Marks	2 Marks
Team ID	XXXXXX	Project Name	edugenie google gemini powered learning assistant

SKILL WALLET — A SmartBridge Product

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1: Onboarding & Goal Setting	Stage 2: Core Learning Interaction	Stage 3: Progress Assessment
Actions What does the customer do?	- Signs up via Google authentication. - Inputs current academic syllabus or professional learning goals. - Selects preferred learning style (e.g., visual, conversational, concise).	- Asks questions about complex topics and requests real-world analogies. - Uploads textbook chapters or lecture notes for quick summarized insights. - Engages with interactive AI quizzes.	- Reviews the personalized dashboard tracking knowledge milestones. - Identifies highlighted conceptual weaknesses. - Receives and follows targeted remedial study recommendations.
Touchpoint What part of the service do they interact with?	- EduGenie Mobile App / Web Landing page. - Intelligent Onboarding Wizard form. - AI Curriculum Setup assistant UI.	- Gemini-powered chat interface. - Document Upload and Parsing Widget. - Dynamic Multi-choice / Short-answer Quiz panel.	- Analytics & Performance Dashboard. - Automated Email Progress Weekly Summary. - AI Personalized Recommendation Engine feed.
Customer Thought What is the customer thinking?	"I hope this AI can understand my specific course layout."	"Wow, that analogy made the concept much clearer than my textbook!"	"It feels great to see my progress chart going up."

Phase of Journey	Stage 1: Onboarding & Goal Setting	Stage 2: Core Learning Interaction	Stage 3: Progress Assessment
	"The interface looks clean, setting up seems straightforward."	"Can I trust this summary to cover everything for my exam?"	"The system accurately caught that I struggle with calculus formulas."
Customer Feeling What is the customer feeling?	- Hopeful but slightly skeptical about personalized curricula. - Relieved by the frictionless, fast setup.	- Engaged and deeply intrigued by instant high-quality dialogue. - Occasionally worried about accuracy/hallucinations.	- Accomplished and motivated to continue. - Supported by clear direction on what to improve next.
Process Ownership Who is in the lead on this?	- UX/UI Design Team - Product Onboarding Lead	- AI Core Integration Team - Content & Prompt Engineering Group	- Data & Analytics Engineering Team - Customer Success Lead
Opportunities How can we improve this stage?	Integrate direct school LMS sync (e.g., Canvas) to fetch data automatically.	Implement a live verification or source-citation system to combat any AI hallucination fears.	Introduce shareable achievement badges to leverage social learning mechanics.
