Data Flow Diagram (DFD)

System Architecture & Data Architecture Assignment

Objective: Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores for your specific project implementation.

DFD Symbol Legend

Symbol / Shape	Name	Description
Oval / Rounded Shape	External Entity	A person, organization, or system outside the project boundaries that sends or receives data (e.g., Student, Google Gemini API).
Rectangle with Numbered Header	Process	An activity or transformation that maps incoming data into outgoing data (e.g., Validate Request, Generate Personalized Content).
Rectangle (Solid Fill, No Number)	Data Store	A repository where data is held for later use or analytical processing (e.g., User Profiles, Learning History DB).
Labeled Arrow	Data Flow	The specific path of data movement between external entities, processes, and data stores, labeled with the data context.
