

Project Name:	edugenie google gemini powered learning assistant	Date:	07/07/26
Team ID:	XXXXXX	Maximum Marks:	5 Marks

1. CUSTOMER SEGMENT(S) [CS]

- **Self-paced Learners:** University students and working professionals seeking personalized upskilling.
- **Diverse Visual/Auditory Learners:** Students needing multi-modal content formatting.

6. CUSTOMER LIMITATIONS [CL]

E.G., BUDGET, DEVICES

- **Attention Spans:** Limited time due to academic or professional workloads.
- **Financial Constraints:** Inability to afford high-end premium private human tutoring.
- **Device Barriers:** Reliance on mobile phones or mid-tier laptops without heavy local computing setups.

5. AVAILABLE SOLUTIONS [AS]

PROS & CONS

- **Static Online Courses (MOOCs):** Pros: Affordable, structural. Cons: Non-interactive, high abandonment rates.
- **Generic AI Chatbots:** Pros: Instant access. Cons: Lack structural educational workflows and contextual persistence.

2. PROBLEMS / PAINS [PR]

+ ITS FREQUENCY

- **One-Size-Fits-All Material:** Standard curricula fail to match unique student learning speeds (*Frequency: Daily*).
- **Conceptual Roadblocks:** Getting stuck on advanced coding or math topics with no immediate feedback loop (*Frequency: High*).

9. PROBLEM ROOT / CAUSE [RC]

- Mass educational platforms scale by standardizing delivery, making individual real-time modifications impossible.
- Traditional human mentoring is structurally restricted by cost, time-zones, and linear availability.

7. BEHAVIOR [BE]

+ ITS INTENSITY

- **Information Hoarding:** Users open dozens of open tabs, tutorials, and videos to cross-verify basic concepts.
- **Intensity:** High frustration, leading to systematic drops in study consistency and platform fatigue.

3. TRIGGERS TO ACT [TR]

- Approaching technical interviews, academic examinations, or continuous professional evaluations.
- Repeatedly failing to debug code or grasp abstract methodologies using static learning manuals.

10. YOUR SOLUTION [SL]

edugenie: A Google Gemini powered learning assistant.

- Context-aware conversational explanations tailoring complex topics on-demand.
- Adaptive multimodal breakdown of engineering, code, and analytical workflows.

8. CHANNELS OF BEHAVIOR [CH]

ONLINE

Coding forums (GitHub, StackOverflow), Discord communities, Web IDEs, YouTube.

OFFLINE

Peer group meetups, university library study hours, traditional textbook annotation.

4. EMOTIONS BEFORE / AFTER [EM]

BEFORE

Overwhelmed, isolated,
confused, discouraged by
information overload.

AFTER

Empowered, clear-minded,
confident, motivated by
immediate hyper-
personalized clarity.
