Communication

Communication Plan: Effective communication is essential for a successful project demonstration. This document outlines the communication strategy used within the team and with stakeholders throughout the project lifecycle, including how updates, issues, and feedback were managed.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Team Standup	Daily	Slack & Google Meet	Team Members	Sync on daily tasks, sub-module progress, and immediate blockers.
2	Progress Update	Weekly	GitHub & Jira	Team Members & Project Mentor	Review weekly project milestones, core architecture, and roadmap alignment.
3	Issue / Bug Discussion	As Needed	Discord & GitHub Issues	Developers / QA Team	Debugging Gemini API integration limits, prompt context errors, and UI bugs.
4	Stakeholder Review	Bi-Weekly	Google Meet / Zoom	Team, Mentor & Stakeholders	Demonstrate interim feature builds (e.g., RAG pipeline, LLM responses) and gather feedback.
5	Final Demo Rehearsal	Once	Google Meet	All Team Members	Complete dry run of the EduGenie platform end-to-end user flows

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
					before final submission.

Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	Misalignment on Gemini API usage, prompt templates, and response formatting tokens.	Scheduled an ad-hoc technical sync, finalized system prompts, and built a shared document detailing exact JSON schemas required for LLM outputs.
2	Asynchronous collaboration bottlenecks due to varying student availability and schedules.	Established core asynchronous communication protocols on Slack using clear triage tags (`@urgent-blocker`, `@review-needed`) and logged handovers in GitHub.
3	Delayed feedback cycles from internal testing of the learning assistant's responsive user interface.	Implemented automated preview deployments using Vercel on every pull request, allowing team members to immediately test and submit feedback via a structured bug sheet.
